

Adaptive Process Accelerator

A Collaborative product of 22by7 Solutions and Adaptive Processes

This is an extremely flexible web based system to define and manage processes in an organization as per its needs and model adoption plan.

It incorporates multiple model requirements and industry best practices. It is completely role and context based, enables multiple layers and layout presentations.

The system also allows for capturing of the company's own best practices. It cuts CMMI/ISO implementation cost by 70% and time by 50%.
